

SB 827 Fact Sheet for Senate District 17: San Jose, Santa Cruz, Gilroy

Senate Bill 827 would allow more housing at the state’s vital transit hubs, a solution to inadequate supply of housing in urban areas, as well as the crushing traffic commutes endured by so many. For example, it would allow buildings up to approximately five stories within one quarter mile of a rail station, which is about a 4 minute walk. Along bus lines, SB 827 would not authorize additional height, but it would legalize so-called "missing middle" housing, such as duplexes and triplexes. SB 827 would retain local controls over housing, including all policies related to demolition and affordability requirements.

SB 827 would mean more jobs, more customers, less emissions, cleaner air, more homes, more families, and a more affordable California. A California for everyone.

How many SB 827-eligible transit stops are in Senate District 17?

Ranked against all 40 Senate districts, District 17 is:

 **#22**
IN BUS STOPS

 **#14**
IN RAIL STOPS

#21
IN TOTAL STOPS

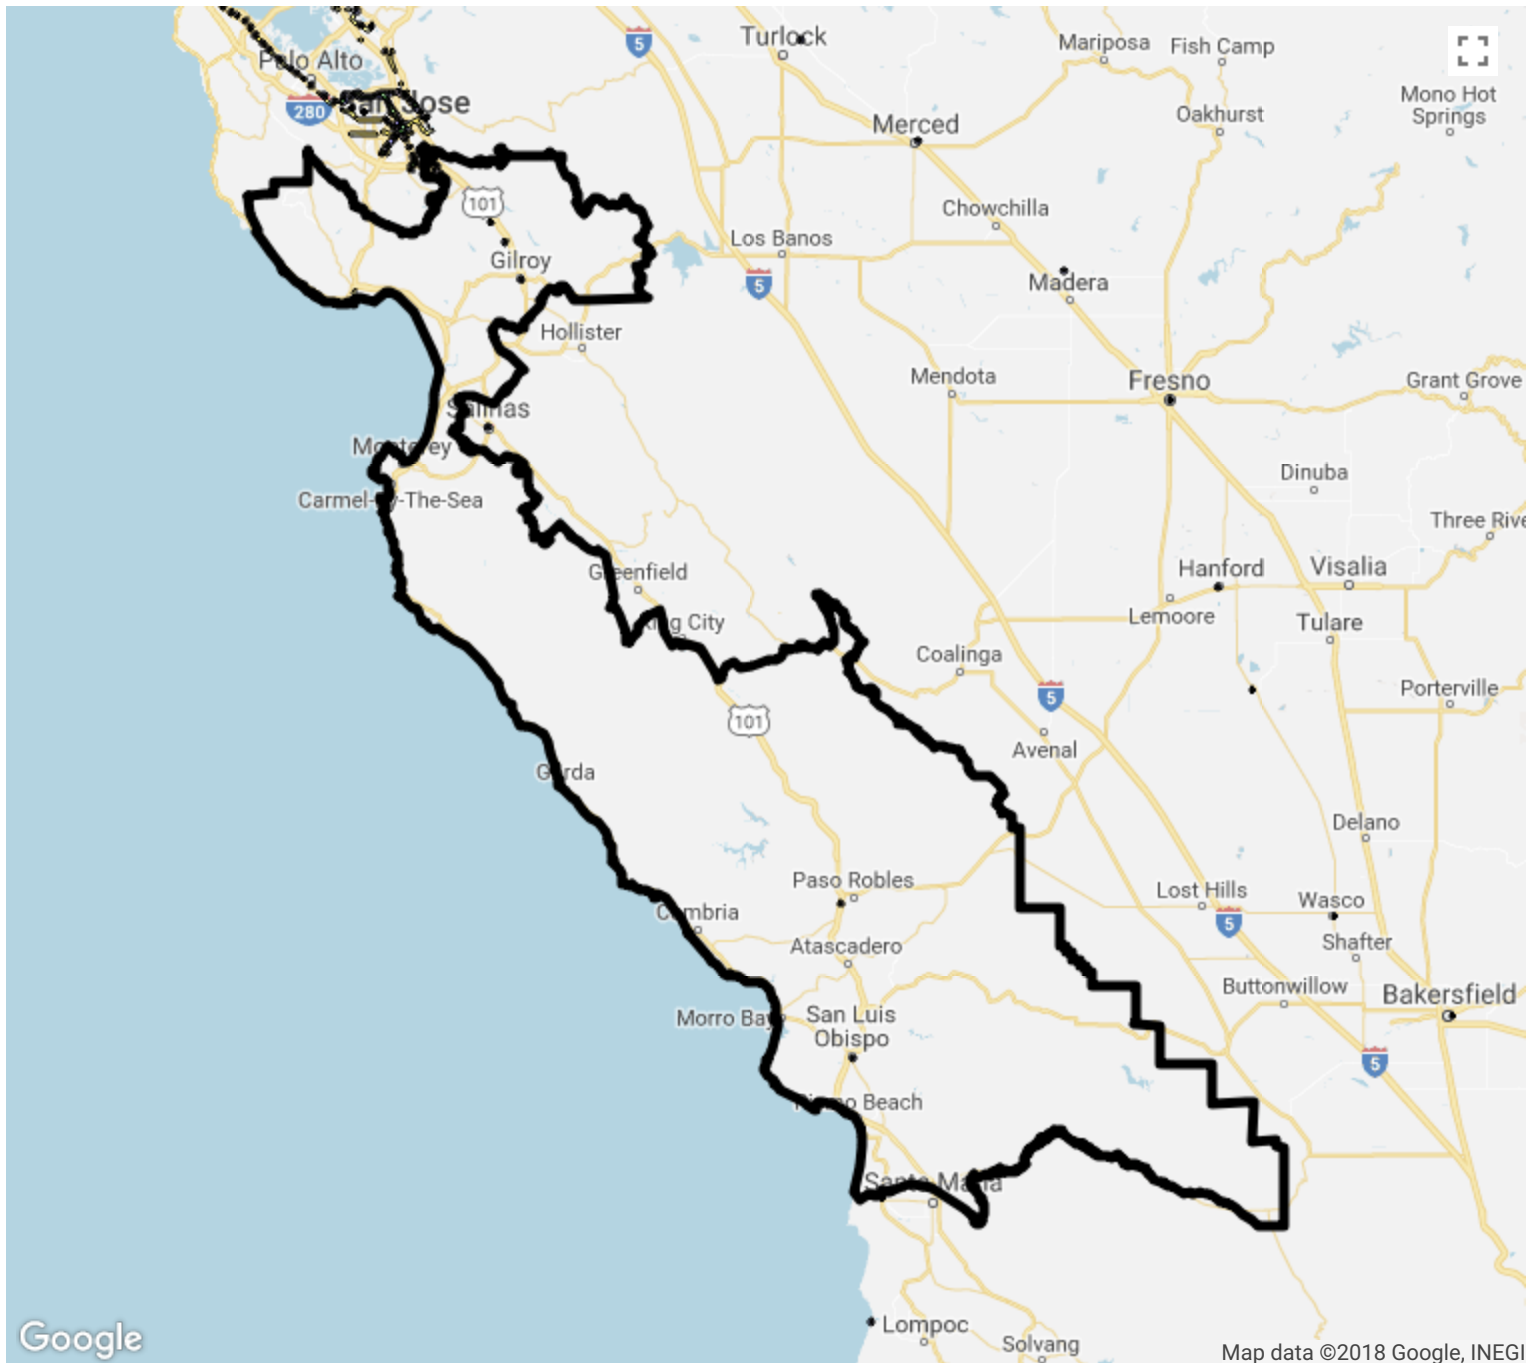

(Note these counts do not represent all transit in SD 17, just stops that are SB 827-eligible.)
