

## SB 827 Fact Sheet for Senate District 33: Long Beach, South Gate, Lynwood

Senate Bill 827 would allow more housing at the state's vital transit hubs, a solution to inadequate supply of housing in urban areas, as well as the crushing traffic commutes endured by so many. For example, it would allow buildings up to approximately five stories within one quarter mile of a rail station, which is about a 4 minute walk. Along bus lines, SB 827 would not authorize additional height, but it would legalize so-called "missing middle" housing, such as duplexes and triplexes. SB 827 would retain local controls over housing, including all policies related to demolition and affordability requirements.

SB 827 would mean more jobs, more customers, less emissions, cleaner air, more homes, more families, and a more affordable California. A California for everyone.

### How many SB 827-eligible transit stops are in Senate District 33?

Ranked against all 40 Senate districts, District 33 is:

 **#7**  
IN BUS STOPS

 **#16**  
IN RAIL STOPS (2-WAY TIE)

**#7**
